Mobile Housing Board

Smoke Free Housing Policy

24 CFR Parts 965 and 966

(Lease Addendum)

The Department of Housing and Urban Development (HUD) has implemented a Rule that requires each Public Housing Authority administering public housing to implement a smoke-free policy. Specifically the Rule requires each Public Housing Authority to implement a policy prohibiting lit tobacco products and all smoking in any interior common areas, including but not limited to community rooms, community bathrooms, lobbies, reception areas, hallways, laundry rooms, electrical rooms and closets, storage units or rooms, stairways, offices, elevators and within all living units in public housing, and Public Housing Authority administration office buildings and vehicles (in brief, a smoke-free policy for all public housing indoor areas). The Mobile Housing Board is also prohibiting electronic nicotine delivery systems (ENDS) and is including it in this policy’s definition of Smoking. This policy extends to all outdoor areas up to twenty-five (25) feet from housing (doors/entrances, windows and porches) and administrative office buildings and maintenance facilities.

HUD is requiring implementation of smoke-free public housing to improve indoor air quality in housing, benefit the health of public housing tenants and public housing staff, reduce the risk of catastrophic fires, and lower overall maintenance costs. This policy applies to all tenants, tenant’s families, tenant’s guests, visitors, contractors, service personnel, and employees.

Purpose of Policy

- 1) To mitigate the irritation and known health effects of secondhand smoke. Smoking or exposure to secondhand smoke (sometimes called environmental tobacco smoke) causes premature death from respiratory disease, cancer or heart disease. Smoking is the number one cause of preventable disease in the United States.
- 2) Smoking or exposure to secondhand smoke (sometimes called environmental tobacco smoke) causes premature death from respiratory disease, cancer or heart disease. According to the EPA, secondhand smoke exposure causes disease and premature death in children and adults who do not smoke. People with chronic diseases such as asthma or cardiovascular disease are particularly vulnerable to the effects of secondhand smoke. Secondhand smoke lingers in the air for hours after cigarettes have been extinguished and can migrate between apartments in multifamily buildings.

- 3) To allow all administrative and maintenance staff the opportunity to perform their job duties in an environment that is nonsmoking.
- 4) Minimize the maintenance, cleaning, painting and redecorating costs associated with smoking.
- 5) Decrease the risk of smoking-related fires to property and personal safety. Fires started by lighted tobacco products, principally cigarettes, constitute the leading cause of residential fire deaths.
